

I understand that you are planing to allow LPFM stations to opperate in my (as well as others) area thereby inhibiting, or interfearing with current FM translator services. I, as well as others in my neighborhood, do listen to K-Love on 91.9, 99.3, or 89.5 (depending on where we are). K-LOVE does serve our community by providing posivite music and messages to listeners and their childern. They allow us to listen, without fear, of what may be said (or sung about) with childern around. They provide news, information and relaxing music, with no commercials, something that is greatly appreciated during commute hours, no radio spurred road-rage here.

If we were to loose the services of K-LOVE, we would be forced to do without radio or have to be ever vial as to what other stations play, be ready to explain verbage, or comments to our childern and not have a place of solitude in our cars on our commutes, or in our homes. We prefer not to be just another statistic of someones idea to increase junk in our airwaves.

I feel that the public is greatly served by K-LOVE in that we need to know and hear that there is good and positive in our world, that everything is not random, but there is an order to our world. That we have a place here that is good, that there are alternatives to drugs, crime, anger and dispair. I know of very few radio stations that will take a stand against the "norm". K-LOVE does allow the public to know that there is hope, that we can break away from the "norm" and move forward out of the gloom that is painted with a broad stroke on other radio stations. Please don't be responsible for darkening the world forever for so many current and future listeners.

Thank you,
Edward R. Jaworowski
